

Abrasive Wheels

Training course for those required to use abrasive wheels alongside equipment such as bench grinders, angle grinders and petrol cut off machines.

This course is designed to provide delegates with the skills and knowledge to **select and safely mount** abrasive wheels, in line with relevant safety regulations and best practice guidance. Delegates receive a comprehensive handout to reinforce what has been learned.

Our abrasive wheels training is ideal for those working in engineering, manufacturing and maintenance environments, amongst others. The course covers compatibility with various equipment types and the use of abrasive wheels across a variety of applications.

Course Type	Operator Experience	Course Duration	Delegates
Abrasive Wheels	Any	Half Day	6 Maximum
