

# Driver CPC Training

Introduced in September 2009 to improve road safety, the Driver Certificate of Professional Competence (CPC) EU Directive states that professional LGV drivers must complete at least **35 hours periodic training every five years**.

We are a registered provider, offering a range of courses approved by the Joint Approvals Unit for Periodic Training (JAUPT) with hours eligible towards the five-yearly quota.

Lorry drivers are often involved in the loading and unloading of vehicles using materials handling equipment. Our courses enable delegates to use their training credits to develop these useful skills.

Courses available with hours eligible towards periodic training include:

- Forklift Truck Introduction
- Forklift Truck Rider Transportable
- Forklift Basic Operation
- Forklift Advanced Operation
- Lorry Loader Novice 2 Day Course
- Lorry Loader Experienced/Refresher
