

# Managing Forklift Operations

Fully accredited course for managers and supervisors who are responsible for overseeing workplace activities involving fork lift trucks.

Though supervisory staff are not required to be qualified forklift operators, they need the knowledge and confidence to be able to identify good and bad practice, in order to maintain a safe working environment.

Managing Forklift Operations outlines key legal requirements and the safety, practical and financial benefits of applying effective management and best practice, including improved productivity and profitability and reduced risk of accidents and damage.
