	Experienced	1 Day	3 Maximum	Make Enquiry

## Pallet Stackers

Pallet stackers enable operators to carry out the same activities as standard pedestrian pallet trucks but with the additional capability of stacking and destacking goods at height. These are often used as a smaller, cheaper and more convenient alternative to traditional reach and counterbalance trucks.

Courses are delivered on the safe operation of all types of stackers – **rider, pedestrian, support arm and straddle trucks** - for all experience levels, at locations nationwide.
